SUMMARY

Senior full-stack engineer with 11 years of experience shipping production software across AI, backend systems, web and native Android. I've led teams of up to 8, designed platforms serving millions of users, and put LLM features into real products with evaluation, guardrails and cost control built in.

EXPERIENCE

Lead Full-Stack Engineer, AI Platform — 2023 — Present

Quillstone Software · Remote

- Architected the RAG platform behind Atlas, now powering 3 product lines
- Built Sentinel, the company-wide LLM evaluation and guardrails platform
- Reduced AI infrastructure spend by 30% through caching, model routing and autoscaling
- Run the AI architecture review and mentor 4 engineers

Python · TypeScript · AWS · LLMs · pgvector

Senior Software Engineer — 2019 — 2023

Corvane Logistics · Toronto, Canada

- Led the monolith-to-microservices migration (Pulse) with zero downtime
- Shipped Android apps used by 40k+ drivers and technicians every day
- Introduced SLOs, on-call runbooks and blameless postmortems
- Mentored 8 engineers, 3 of whom were promoted to senior

Go · Kotlin · Kafka · Kubernetes · PostgreSQL

Full-Stack Developer — 2016 — 2019

Brightpath Digital · Toronto, Canada

- Delivered 15+ client projects, including the CareLink telehealth launch
- Created a React component library adopted across the studio
- Set up the studio's first CI/CD pipelines and testing standards

React · Node.js · Java · Android · AWS

Software Developer — 2014 — 2016

Ferrowave Commerce · Toronto, Canada

- Built order-processing APIs handling 10k orders per day
- Optimized critical SQL reports from minutes to seconds

PHP · Java · MySQL · JavaScript

SELECTED PROJECTS

Atlas — Enterprise Knowledge Copilot (2025): A RAG assistant that answers employee questions across 2.3M internal documents, with cited sources and permission-aware retrieval. Impact: −62% time-to-answer; 91% accuracy on graded eval set; −45% LLM cost via caching & routing.

Pulse — Real-Time Fleet Telemetry (2024): An event-driven platform tracking 50,000+ vehicles with sub-second updates, live ETAs and geofence alerts. Impact: 300k events/sec sustained; p99 freshness 4 min → 220 ms; 99.95% uptime over 12 months.

Fieldnote — Offline-First Android App (2024): A Kotlin app for 2,800 utility technicians that works fully offline and reads meter photos with on-device ML. Impact: 4.7★ Play Store rating; Reading errors 7% → 1.2%; Works 100% offline.

Sentinel — LLM Evaluation & Guardrails (2025): An internal platform that tests, monitors and guards every LLM feature in the company — evals in CI, tracing in production. Impact: Adopted by 4 product teams; 23 regressions caught before release; PII leaks in logs: 0.

SKILLS

Languages: TypeScript, JavaScript, Python, Go, Kotlin, Java, SQL

AI / ML: LLM APIs, RAG, LangGraph, Embeddings, PyTorch, scikit-learn, XGBoost, TFLite, pgvector

Frontend: React, Next.js, Redux Toolkit, Tailwind, Vite, Storybook, Playwright

Backend: Node.js, FastAPI, Spring Boot, gRPC, GraphQL, REST, WebSockets

Mobile: Android SDK, Jetpack Compose, Coroutines / Flow, Room, WorkManager, Hilt, React Native

Data & Infra: PostgreSQL, Redis, Kafka, ClickHouse, Docker, Kubernetes, Terraform, AWS, GCP

EDUCATION & CERTIFICATIONS

B.Sc. Computer Science, Lakeshore Institute of Technology 2014
AWS Certified Solutions Architect – Professional, Amazon Web Services 2023
Certified Kubernetes Application Developer (CKAD), CNCF 2021
Associate Android Developer, Google 2019
